

# Dr. Degenstein Whitepaper

## Introduction

Dr. Degenstein (\$DRDGN) is the Lab's master formula—combining innovation, community energy, and meme-fueled chaos into one banner token. Following successful field tests with \$SUCK (Vampenstein) and the arrival of \$KITTY (Miss Kittystein), \$DRDGN leads the Degenstein Labs ecosystem forward.

## The Lore

In the neon shadows of the chain, a restless scientist stitched together liquidity, lore, and a little madness. The experiment didn't just work—it created its keeper: **Dr. Degenstein**.

Every token is an experiment. Every holder is part of the **Degenstein Army**. \$SUCK hunts red candles until they turn green. \$KITTY lands charts on their feet. And \$DRDGN binds the Lab's creations under one banner.

## Roadmap

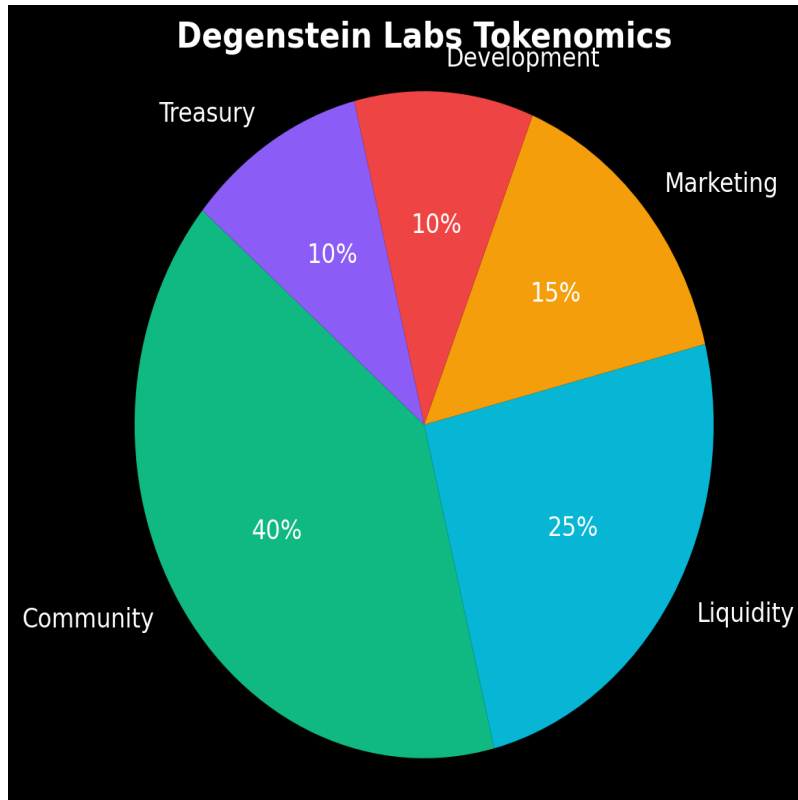

**Phase 1 — Creation:** Launch of \$SUCK, \$DRDGN, and \$KITTY. Site + Army founded.

**Phase 2 — Growth:** Listings, raids, social expansion, community ops.

**Phase 3 — Expansion:** NFT drops, collabs, FreshCoins & tool integrations.

**Phase 4 — The Lab Awakens:** Unified ecosystem: staking, governance experiments, deeper lore & releases.

## Tokenomics

### Allocations:

- 40% Community (rewards, giveaways, growth)
- 25% Liquidity (stable trading)
- 15% Marketing (hype & outreach)
- 10% Development (new experiments)
- 10% Treasury (long-term)

**Community**

The Degenstein Army powers every experiment. Through Telegram, X, and beyond, raids, meme contests, and reveals amplify the Lab's signal. Join, contribute, and help decide what the Doctor builds next.

**Disclaimer**

The tokens featured (\$DRDGN, \$SUCK, \$KITTY) are community-driven meme coins. They are not regulated financial instruments or securities. Participation carries risk—always **DYOR**.
