Degenstein Lab Tokens Whitepaper

Introduction
The Degenstein Lab is a growing multi-token experiment on Solana: $DRDGN (Dr. Degenstein), $SUCK (Vampenstein), $KITTY (Miss Kittystein), and now $PENGA (Pengastein). Each coin is designed to push meme■coin culture forward through innovation, community energy, and a spark of mad science.

The Lore
In the neon shadows of the chain, a restless scientist stitched together liquidity, lore, and a little madness. The experiment created its keeper: Dr. Degenstein. Every token is a unique experiment and every holder is part of the Degenstein Army. $SUCK hunts red candles until they turn green. $KITTY lands charts on their feet. $DRDGN binds the Lab's creations. $PENGA dives in with icy precision, symbolizing playful strength and cross■community connections.

Roadmap
Phase 1 — Creation: Launch of $SUCK, $DRDGN, and $KITTY. Site + Army founded.
Phase 2 — Growth: Listings, raids, social expansion, community ops.
Phase 3 — Expansion: NFT drops, collabs, FreshCoins & tool integrations.
Phase 4 — The Lab Awakens: Unified ecosystem: staking, governance experiments, deeper lore & releases.

Periodic Token Burns
To reinforce scarcity and support long-term value, the Lab executes periodic token burns. Scheduled burns remove a portion of supply across $DRDGN, $SUCK, $KITTY, and $PENGA, strengthening holder confidence and creating deflationary

pressure that rewards active community members.

Audits & Security

$KITTY is fully audited with a 95%+ trust and security rating on FreshCoins. This third-party verification proves that no hidden minting, freezing, or malicious functions exist in its contract. Auditing provides peace of mind for holders and investors by ensuring transparency and code safety. The rest of the Degenstein Lab tokens ($DRDGN, $SUCK, and $PENGA) are in line to follow the same audit process, reinforcing the Lab's long-term commitment to trust and security across the entire ecosystem.

Tokenomics

Allocations:
• 40% Community (rewards, giveaways, growth)
• 25% Liquidity (stable trading)
• 15% Marketing (hype & outreach)
• 10% Development (new experiments)
• 10% Treasury (long-term)

Community

The Degenstein Army powers every experiment. Through Telegram, X, and beyond, raids, meme contests, and reveals amplify the Lab's signal. Join, contribute, and help decide what the Doctor builds next.

Disclaimer

The tokens featured ($DRDGN, $SUCK, $KITTY, $PENGA) are community-driven meme coins. They are not regulated financial instruments or securities. Participation carries risk—always DYOR.
